Schedule/Milestones

** when a task is assigned under the week, that means that the task is assigned at the start of the week and due the next week

Frontend: Mimi, Christy, Kevin

Backend: Omer, Quan

- Week 4 (1/22)
 - o Come up with Project Proposal and Schedule
 - o Decide on API endpoints
 - o Build Github repository to begin collaborating
- Week 5 (1/29)
 - o Have authentic endpoints with JWT and Bcrypt complete
 - o Create utility functions on client
 - o Work on mock ups
 - o Learn React basics
- Week 6 (2/5)
 - o Go over React basics
 - o Final front-end mock ups and have basic blocks of website rendered
 - o **Milestone #1:** Finish back-end
- Week 7 (2/12)
 - o Sign in and registration page front-end
 - o Schedule page to display events (similar to the schedule format of Google Calendar)
 - o Component to expand an event when clicked on from schedule page
 - Displays event title, event description, deadline, comments
 - o Component to create comment
- Week 8 (2/19)
 - o Component to create event
 - Input for event title, event date/deadline, event description
 - o Profile page to add/remove/create groups
 - Component to create group with group title
 - o Component to create group event
 - o **Milestone #2:** Finished front-end
- Week 9 (2/26)
 - o Setup database connection with front-end
 - o Detailed README (using Markdown?): accurately and completely describes how to run app locally (entire group)

- Week 10 (3/5 - 3/9 (due date))
 - Finish remaining features and any workarounds/adjustments if necessary
 - Polish app frontend and prepare for presentation.
 - Finish individual reports
 - Party time!
